

War

- ⇒ You will need a deck of cards for each team of two players
 - ⇒ Before you start, write on the board, Ace = 1, J = 0, Q = 11, K = 12
1. Students pair up and shuffle their cards.
 2. They deal the cards out evenly and stack them face down in front of them.
 3. Both students turn over their top card at the same time. They multiply the 2 cards and shout the answer. The winner puts the cards in his/her/ winning pile. If a tie occurs, keep turning cards until someone wins the pile.
 4. When all of the original stack has been played, they count their winnings. The winner gets a point, token, skittle, etc. They then switch partners.
